

New design – a ray of sunshine

Solar cell lamps are not a new thing. However, there is something highly innovative about the SunLight solar cell lamp from Eva Solo. Eva Solo has successfully integrated the solar cells into the design of the SunLight lamp so that the solar panel is completely concealed. This makes the lamp far more attractive to look at and a much more decorative feature in the garden and on the patio.

The lamp gives you energy-friendly cable-free lighting in a stylish design and provides the perfect ambient patio illumination. The lamp is available both as a table lamp and as a garden lamp with a spike for pushing into the ground.

Position one or more lamps beside the garden path or around the garden to help you find your way in the dark. The table lamp also adds a decorative touch to the garden table.

During the day the lamp soaks up the sun so that it can light up the dark at night. After a day in full sunshine, the lamp will provide up to 20 hours of illumination, depending on the weather conditions when the lamp was charging. The lamp features an on/off switch and a smart auto function for setting it to automatically switch on and off. The lamp is the perfect choice for the environmentally conscious consumer who is looking for CO₂-friendly products, and who also appreciates design and functionality.

The SunLight solar cell lamp is made of frosted glass, while the foot/spike is made of anodised aluminium. The lamp is frost-proof and can thus be left outdoors all year round. The lamp comes with a 15,000-hour LED bulb and a lithium battery.

Designed by Claus Jensen and Henrik Holbæk, Tools®. Recommended retail price for each version EUR 59.95. To find your nearest dealer, please call +45 36 73 20 60. Also visit: www.evasolo.com. For further information, please contact Eva Solo Marketing: tel. +45 36 73 20 74 / email sif@evasolo.com.
